

WHEN GETTING YOUR HAIR AND MAKE UP DONE IN THE COMFORT OF YOUR HOME THERES A FEW THINGS TO CONSIDER AND PREPARE.. HERE ARE SOME TIPS ON HOW TO..

- **Hair Prep** - If you are wanting a hair up please have your hair washed and freshly blowdried. Its a myth that hair goes up better if its unwashed as we can use products to make it stay in place.
- **Hair Prep** - If we are doing a blowdry please have your hair washed and wet ready. Please specify what look your wanting to achieve before the appointment.
- **Face Prep** - Please have a fresh face having done your usual skin routine at least 2 hours before I arrive. If you have a cold sore or any open wounds on the face please let me know before I arrive. The service will NOT be resumed and payment will still be taken if not informed beforehand.
- **Timing** - If there are numerous girls in your booking and your are having hair and make up I will start by curling at setting everyones hair first, this way the hair can be setting whilst everyone is having their hair and make up done. Curl and setting the hair creates the best foundation for hair to be put up.
- **Images** - Please collect images of what you like. Sometimes it is more helpful to find what you dont like too so please have any images ready.
- **Covid Precautions** - Please wear a face covering if you wish to do so, if you are exempt this is absolutely fine. Please have a spacious, clean environment for us to be in preferably away from family members.
- **Payment** - You can pay via cash or bank transfer, cash is preferred. I am completely transparent with my pricing and will always inform you of the price before the appointment.
- **The Way I Work** - On arrival I will set up everything we need to make it comfortable and professional including gowns and protective clothing.

I will carry out a full consultation on what we will be doing and make sure we are both happy. The hair will be first curled and set or blowdried and pinned, make up is then done while the hair is cooling, the hair is then dressed out and finished. Hair and make up will usually take around 1.5 hours in total.

**I have everything we need to make your service comfortable and professional, however I need a high surface for my kit so the kitchen is the best place for us to work. At the end I will ask if you are happy with everything, this is your chance to speak up, try something different or make me aware of something your not happy with. Please don't be shy with this as there's nothing with hair we can't rectify. I aim to make my clients feel comfortable and confident and pride myself on providing the highest service and professionalism.**
